Professional Summary

Full-stack Developer with expertise in frontend and backend technologies, delivering scalable web applications impacting over 3 million users globally. Skilled in React, TypeScript, Next.js, and Node.js, with proven success in AI-driven automation projects and performance optimizations. Recognized for collaborating effectively across teams to build reliable, high-quality software solutions.

Work Experience

Frontend Developer – Deriv

August 2023 – Present | Cyberjaya, Malaysia

- Maintained and enhanced cashier and payment systems for global web applications serving over 3 million customers, collaborating with backend, design, and QA teams across multiple regions using React, TypeScript, and Agile methodologies.
- Increased unit test coverage to over 80% using Jest, and supported Cypress.io/Testim E2E automation.
- Optimized wallet package performance using Webpack, reducing bundle load size by 74% for faster, more efficient delivery.
- Contributed to the company's low-code platform redesign using Outsystems, improving maintainability and feature rollout speed.
- Earned 3× Stars of the Month and nominated for the Rising Star programme for consistently high delivery quality and measurable performance improvements.

Frontend Full Stack Developer (Freelance) – Mindhive Asia Sdn Bhd

August 2024 – June 2025 | Shah Alam, Malaysia

- Led front-end development for AI-driven solutions in Next.js and React, including document processing and accounts payable/receivable automation.
- Partnered closely with backend engineers (Python, SQL) and designers to implement and integrate REST APIs, authentication, and data management.
- Delivered 4 full projects for ZUS Coffee and contributed to 2 ongoing enterprise projects, earning positive client feedback for quality and timeliness.
- Implemented reusable UI libraries and modular code structures to improve maintainability across multiple client projects.

BeSquare Graduate Trainee Programme – Deriv

March 2023 – July 2023 | Cyberjaya, Malaysia

- Gained comprehensive exposure to frontend, mobile, backend, QA, and UI/UX design modules.
- Worked collaboratively on multidisciplinary teams to deliver functional full-stack prototypes.
- Won the Mobile Development Hackathon and Product Design Competition; runner-up in Frontend Hackathon.

Internship and Working Student – Canzler GmbH

September 2020 – March 2021 | Dresden, Germany

- Worked in technical building automation (heating, cooling, ventilation, and sanitation technology) and energy systems using Trimble Nova and AutoCAD.
- Strengthened analytical and engineering problem-solving abilities through cross-disciplinary collaboration.

Education

Hochschule Zittau/Görlitz

April 2022

Bachelor of Science in Mechanical Engineering (Bachelorabschluss in Energietechnik)

Note 2,1 (Equivalent to US GPA of 3.5). Major in Energy Technology

Certifications

Javascript Foundations Professional Certificate – Mozilla Developer Network

June 2024

CS50's Introduction to Computer Science – Harvard edX

December 2022

Computer Science for Artificial Intelligence – Harvard edX

November 2025

Skills

Technical Skills - Frontend: React, Next.js, TypeScript, JavaScript, HTML5, CSS3, SASS, TailwindCSS, Shadcn, Outsystems

Technical Skills - Backend: Node.js, Python, SQL, Redis, Docker, Firebase, Supabase

Technical Skills - Mobile: React Native, Flutter (Dart), Bloc/Cubit architecture

Technical Skills - Testing: Jest, Octomind, Cypress.io, Testim (unit & E2E testing)

Technical Skills - Version Control / Systems: Git, Linux, Ubuntu, CI/CD basics

Technical Skills - Cloud & Deployment: Intro to GCP & AWS, Docker containers

Technical Skills - Languages: English & Malay (Native), German (C1 TELC Hochschule)

Soft Skills: Fast learner with excellent critical thinking and analytical skills, strong interpersonal and cross-functional collaboration abilities, detailoriented and proactive in continuous improvement, able to work independently and deliver under tight deadlines.
